Leonardo Lemes Prokopowiski

Campo Largo/PR | (41)99997-0504 | leoprokopowiskii@gmail.com | linkedin.com/in/leoprokopowiski

OBJECTIVE

Junior Full-Stack Developer / Software Developer – focused on web development, backend, and automations.

PROFESSIONAL SUMMARY

Early-career technology professional with corporate experience and active participation in internal systems and product development. Hands-on expertise in Python, JavaScript, TypeScript, React, Node.js, Flask, Git, Docker, REST APIs, and databases. Seeking opportunities to grow as a developer, contributing with clean code, automations, systems integration, and continuous product improvement.

PROFESSIONAL EXPERIENCE

SPRO an NTT DATA company – Product Apprentice | Software Development

09/2025 – Present | Curitiba/PR

- Active development and evolution of internal applications in the Products area, participating in the implementation of new features, automations, integrations, and improvements to existing systems.
- Developing solutions utilizing Python, Flask, JavaScript, TypeScript, React, Node.js, REST APIs, and Docker.
- Participating in authentication flows, report generation, dashboards, and process automations focused on project and delivery tracking.
- Utilizing Git and Azure DevOps for code versioning, branches, Pull Requests, task management, and delivery workflows.

PROJECTS & TECHNICAL PRACTICE

SPRO SIGAP – Python / Flask / React / Node.js / Keycloak

- Contributed to the development and evolution of SIGAP, an internal platform created to support Scrum Masters, PMs, and POs in project management and tracking.
- Implemented features including process automations, weekly and sprint reports, tactical delivery dashboards, microservice integrations, and Keycloak authentication.
- Centralized project data and indicators, enabling product teams to track deliverables effectively and providing actionable metrics for management and executive leadership.
